

CITY OF LODI COUNCIL COMMUNICATION

AGENDA TITLE: Set ~~Public~~ Hearing for May **16,2007** to introduce ordinance amending Chapter **13.20**, "Electrical Service," by replacing Section **13.20.175** Schedule MCA (Market Cost Adjustment) ~~with~~ Schedule ECA (Energy Cost Adjustment) to become effective July **1,2007** (EUD)

MEETING DATE: May **2,2007**

PREPARED BY **Electric** Utility Director

RECOMMENDED ACTION: Set a public hearing for May 16,2007 to consider changes to Chapter 13.20, "Electrical Service," by replacing Section 13.20.175 Schedule MCA (Market Cost Adjustment) with Schedule ECA (Energy Cost Adjustment). It is recommended that implementation be effective July 1, 2007.

BACKGROUND INFORMATION: Prior to December 2002, when the Market Cost Adjustment (MCA) was implemented, Lodi's electric rate schedules included an element similar to the ECA which was called a purchased power ~~cost~~ adjustment (PPCA). The applicability of the MCA superceded the old PPCA. Whereas the PPCA was applied equally to all kWh on all rate schedules, the MCA has been applied differently to specific rate classes and in ~~some~~ cases on a tiered amount based on monthly consumption. At times, some rate classes saw as much as 19¢ per kWh MCA, while others received little or no MCA. The MCA was intended to be reviewed/revised on a quarterly basis and requires City Council action to make adjustments. The proposed ECA, on the other hand, would provide for "automatic" adjustments with reduced electricity prices theoretically just as likely as increased charges.

Similar schedules are utilized by electric utilities nationwide, including many of California's publicly owned utilities (i.e. Anaheim, Redding, Pasadena, Los Angeles, Imperial Irrigation District, and Roseville). Both of the financial rating agencies (Standard & Poors and Fitch) involved in periodic assessment of Lodi Electric Utility's financial condition and outlook have strongly supported the implementation of automated energy cost adjustment mechanisms as proposed herein.

The ~~initial~~ ECA base rate (~~\$.0831~~) being proposed is the approximate energy cost per kWh as reflected in current electric rates. The ECA would be recalculated each month as actual ~~costs~~ are determined and the resulting values implemented for bills rendered on the first day of the following month. Staff also proposes to provide ECA calculations to the Lodi Budget and Finance Committee for their ongoing verification.

The ECA ~~would~~ be a component of all City of Lodi electric rate schedules, be nondiscounted and would replace Schedule MCA – Market Cost Adjustment.

Attached is a copy of the proposed Schedule ECA, a 12-month example utilizing fiscal year 2008 projected sales energy ~~costs~~ and a preliminary financial forecast for fiscal year 2008.

FISCAL IMPACT: The **ECA** is intended to be revenue/cost neutral – e.g. when energy costs increase, the **ECA** increases to offset such costs. The reverse is true during periods of energy cost declines. At the proposed base **ECA** level of .0831 per kilowatthour and projected fiscal year 2008 energy costs of \$43.3 million, **ECA** net revenue of \$3.2 million is projected for fiscal year 2008. This is projected to result in a net increase in fiscal year 2008 working capital of \$1.4 million. (see attached.)

FUNDING: Not Applicable.

SCHEDULE ECA

ENERGY COST ADJUSTMENT

APPLICABILITY:

This schedule is applicable to all electric customers served by the City of Lodi. Each customer shall pay the applicable rate plus an Energy Cost Adjustment (ECA) for each kilowatt-hour (kWh) delivered to the customer. The adjustment shall be the product of the total kilowatt-hours (kWh) for which the bill is rendered times the adjustment amount per kWh.

The purpose of the ECA is to adjust for increases/decreases to the City of Lodi's wholesale energy costs. This adjustment provides a mechanism to recover increased costs for wholesale energy or to lower collections when costs decrease below the base charge level.

RATES:

Effective July 1, 2007, the ECA billing factor for any given month shall be calculated as follows:

$$ECA = \frac{(a) + (b) - (c)(d+f)}{(e)} - (f)$$

Where:

- (a) equals the amount the City of Lodi is actually charged by the Northern California Power Agency for the billing month, including adjustments for prior billing periods, less any third party revenue credits.
- (b) equals the City of Lodi's estimated costs related to the acquisition of wholesale power, both financial and physical, procured directly by the City for the billing month, including adjustments for prior billing periods.
- (c) equals the difference between actual retail energy sales and projected sales level for the month which is two (2) months prior to the billing month.
- (d) equals the ECA billing factor for the month which is two (2) months prior to the billing month.
- (e) equals the forecast of projected retail energy sales for the billing month.
- (f) equals the baseline energy cost for the City of \$0.0831.

The City of Lodi will recalculate the ECA each month, and resulting amount shall be automatically implemented for bills rendered during the following billing month. ECA calculations will be presented to the Lodi Budget and Finance Committee for their ongoing audit verification.
